

Mathematics

Multiplication and division (especially the 3, 4 and 8 times tables) is a big focus for the summer term. We will also be focussing on fractions of shapes and quantities before moving on to geometry and money.

Science

Our Science topics this term are Light and Plants. Children will be working scientifically throughout the units to plan fair tests and investigate different aspects of light and plants. They will also be recording and presenting their findings in different ways. It would be helpful if children could study any plants at home carefully too.

English

Throughout the year, the children in year 3 have studied a range of excellent books and authors. This term will focus on the great Roald Dahl. The children will be reading *The Twits* and writing their own character descriptions as well as creating a new chapter for the book.

Topic

We will be focussing on PSHE at the beginning of this term, thinking about kindness, respect and friendship. After that, the children will be learning all about the Roman Empire and its impact on Britain. This is a very exciting topic in which the children will learn all about the Roman Empire, Roman Legacies, Boudicca and much more.

Summer 2019

Year 3

Class Teacher: Mrs Yates and Mrs Evans

Teaching Assistants: Mrs Bainbridge,
Miss Roscoe and Miss Hancock

Through learning and loving we will follow Jesus.

Religious Education

The children will learn about the energy of the Holy Spirit this term before moving on to special places around the world. These special places include places of worship, special places for Jesus and our world as a special place.
